EDUCATION

North Idaho Community College

Associates of Information Technology

Coeur D' Alene, ID

Jun. 2017 – May 2020

EXPERIENCE

Full-stack Developer

June 2021 – January 2023

Ancient Realms LLC

- Worked closely with our designer to align our ideas and implement the wireframe into functional pages and components.
- Assisted in implementing a third-party cloud wallet for users to login and interact with the site, improving user engagement and security.
- Developed the game smart contract, token contract and reward contract with C++ using the wax blockchain contract development toolkit.
- Refined and maintained smart contracts for game logic, storage cost, and transaction costs.
- Contributed to marketing and social media efforts, resulting in our Discord server peaking at 16,000 players and selling out our product within minutes.
- Played a pivotal role in leading the Ancientrealms team towards achieving a seven-figure trading volume.

Full-stack Developer (Contract)

August 2024 – November 2024

NewGen Labs

- Implemented email-password authentication with password reset functionality using Passport.js, Node.js, and Express.
- Integrated Google and Discord OAuth, and enabled users to connect their crypto wallets to their accounts increasing product sales by allowing more wallet providers.
- Worked with designers to develop and wire frame multiple pages to showcase products and provide essential information.
- Created a product purchase page, allowing users to purchase products with multiple crypto wallet providers.
- Managed the backend and implemented various rate-limiting middleware solutions to secure the server.
- Utilized AWS S3 buckets to store user-uploaded images, performing compression, size limitation, and file type conversion on the backend, saving on bandwidth and storage.

PROJECTS

Wordle Clone | [JavaScript](#), [React](#), [Tailwind](#), [HeadlessUI](#) | [Live Demo](#)

- Developed a clone of the popular web game Wordle using React and JavaScript.
- Implemented Local Storage to track user statistics, enhancing the user experience.
- Utilized JavaScript's built-in methods to streamline development.
- Integrated HeadlessUI to add smooth transitions and improve interactivity.

Fullstack Application | [React](#), [React-Query](#), [Node](#), [Typescript](#), [Mongoose](#), [Mongodb](#), [Express](#), [Docker](#), [Caddy](#), [Jest](#)

- Implemented React-Query for efficient data fetching, caching, and manipulation on the frontend.
- Developed RESTful API endpoints using Express and integrated them with MongoDB using Mongoose.
- Containerized the frontend, backend, and database using Docker for a consistent development and deployment environment.
- Configured Caddy as a reverse proxy with DNS management to enable HTTPS in the development environment.
- Secured the application using JWT tokens with refresh tokens for session management and improved security.
- Wrote unit and integration tests for frontend and backend endpoints using Jest to ensure code reliability and coverage.

SKILLS

Languages: HTML/CSS, JavaScript, TypeScript, C++, PostgreSQL

Frameworks: React, Node.js, Express, Next.js, Tailwind CSS

Developer Tools: Git, Docker, Vercel, Figma, VS Code, Storybook, npm

Libraries: Redux, Zustand, Mongoose, MongoDB, Socket.io, Jest, Supabase
